

DECLARATION ON THE USE OF INTERMEDIATES

in accordance with Article 18 of Regulation (EC) No 1907/2006 (REACH)

Valid until 31 December 2027

Company / declarant

Address

Product

CAS No.

EC No.

Intended use of the product:

☐ Our company is the end user of the product and confirms that:

We use the product under the "strictly controlled conditions" specified in Article 18(4) of Regulation (EC) No 1907/2006. The product is used as an intermediate for synthesis and meets the definition of an intermediate set out in Article 3(15) of Regulation (EC) No 1907/2006.

☐ Our company is a distributor of the product and confirms that:

We handle the product under the strictly controlled conditions specified in Article 18(4) of Regulation (EC) No 1907/2006. We supply the product only to end users who provide written confirmation that the product will be used exclusively as an intermediate for synthesis in accordance with Article 3(15) and under the strictly controlled conditions specified in Article 18(4), or to distributors who provide equivalent written confirmation.

☐ The above-mentioned product is supplied to a logistics service provider.

In addition to the customer's address, the delivery address should be provided where applicable.

Confirmation of strictly controlled conditions

We confirm that we are familiar with Regulation (EC) No1907/2006 (REACH) and the definition of transported isolated intermediates under Article 3(15). We confirm that the above-mentioned product is used as an intermediate in accordance with that definition and under strictly controlled conditions in accordance with Article 18(4). In particular:

- (a) the substance is rigorously contained by technical means during its whole lifecycle, including manufacture, purification, cleaning and maintenance of equipment, sampling, analysis, loading and unloading of equipment or vessels, waste disposal or purification and storage;
- (b) procedural and control technologies are used to minimise emissions and any resulting exposure;
- (c) only properly trained and authorised personnel handle the substance;
- (d) in the case of cleaning and maintenance works, special procedures such as purging and washing are applied before the system is opened and entered;
- (e) in cases of accident and where waste is generated, procedural and/or control technologies are used to minimise emissions and resulting exposure during purification, cleaning and maintenance procedures;
- (f) substance-handling procedures are well documented and strictly supervised by the site operator.

We understand that internal documentation demonstrating compliance with the requirements of Article 18(4) must be maintained and made available by users of intermediates at the request of competent authorities.

Synhetika Sp. z o.o. will promptly notify the relevant contracting party of any change affecting this confirmation.
